

Connecting to the RemoteApps Feed – Mac / Android

RemoteApps is available to use on Apple and Android mobile devices. To use RemoteApps you will need to download the Microsoft RD Client. This can be found in the Google Play and Apple Stores by searching for 'Microsoft Remote Desktop'. This is a free download, the icon looks like the one below.

Once downloaded, load the App from your home screen or application launcher. The interface will look slightly different depending on the device you are using it on. To connect to the RemoteApp feed you will need to find the button for Add Workspace. This is generally found under the + button as shown below. On some devices it is called Remote Resource Feed.

Once clicked, this will load the Add Workspace box. Enter your school email address and the Workspace URL will be automatically populated. Once this is done, click Add to proceed, or choose 'Add User Account' from the User Account drop down box.

Add Workspace

A workspace is associated with this email address.

Workspace URL:

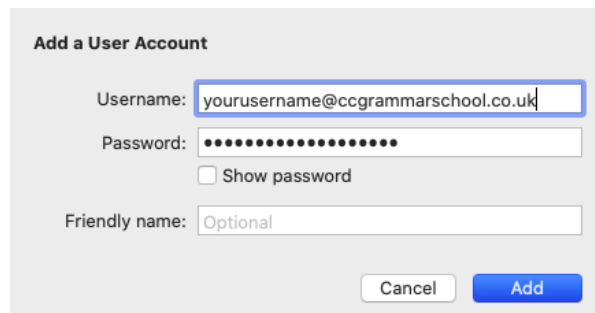

Links to remote apps, PCs and files will be downloaded and automatically updated if you add the workspace.

User account:

If you continue, you will be asked for a user account that will be used to add the workspace.

Privacy settings for managed resources are preset by your organization.
[Learn more](#)

You will then be asked for credentials to connect. You should enter your **school email address and password** in the relevant boxes.

Add a User Account

Username:

Password:

☐ Show password

Friendly name:

You can now click Add Feed. After a few moments you should see icons for the applications you are able to use.
